

BLUE RIBBON PRODUCTS

CHEMIGATION CHECK VALVES

- ❖ Epoxy Coated – provides a chemical resistant finish for years of dependable service
- ❖ Spring Loaded Check Valve Disc – does not rely on water pressure to close it
- ❖ Safety Sump and Automatic Low-Pressure Drain – allows drainage of any liquid seeping past the check valve before it can enter the well
- ❖ Inspection Port – easily removable cap allows you to visually inspect check valve to see if it is working properly
- ❖ Air Vacuum Valve – provides air inlet when well shuts down
- ❖ Flanged – for easy removal from pipeline (also available with irrigation fittings)
- ❖ Drain Tubing – (optional) allows transfer of any low pressure drain seepage 20-30 feet away from well area.
